SUMMARY

Computer Science Engineering student interested in AI/ML also with hands-on experience in academic and personal projects. Eager to learn, build practical solutions, and gain real-world industry experience.

EDUCATION

Bachelor of Technology in CSE (Artificial Intelligence & Machine Learning) **2023 - 2027**

Panipat Institute of Engineering and Technology

Affiliated to Kurukshetra University, Kurukshetra

SKILLS

Languages: Python, C++, SQL, HTML, CSS

Libraries/Frameworks: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, SciPy

Data Science & ML: Data Preprocessing, Exploratory Data Analysis (EDA), Model Building, Model Evaluation

AI: Prompt Engineering, Agentic AI & n8n

Tools/Platforms: Git, GitHub, Jupyter Notebook, VS Code, Google Colab, Docker

Core CS: DSA, OOPs, OS, DBMS, Networks

Soft Skills: Problem Solving, Leadership, Team Collaboration, Quick Learner, Consistency & Discipline

EXPERIENCE

Fox Trading Solution , Project Intern - Machine Learning (Remote) **July - August 2025**

Developed and evaluated ML models for diabetes prediction, human action detection, and bike-sharing demand forecast.

SkillifyMe, Training and Internship program - AI/ML (Hybrid) **July 2024**

Learned Artificial Intelligence & Machine Learning concepts using Python and build a Loan Approval Prediction model.

PROJECTS

UniHub - AI-Powered Campus Assistant : *Python, LLM APIs, HTML & CSS, Firebase*

- All-in-one campus platform for students to manage attendance, lecture schedules, assignments, results, events, marketplace, and student community interactions with smart assistant support and real-time updates.
- Integrated the AI assistant with campus data sources to provide quick, accurate, and context-aware responses.

AutoMark - Face Recognition Attendance System : *Python, Face Recognition, Firebase, HTML & CSS*

- Attendance management system that uses face recognition to automatically detect and mark student attendance with real-time monitoring, secure data handling, and reduced manual effort.

Cricket Analyzer : *Python, Pandas, Matplotlib*

- A cricket data analysis and visualization system to analyze player and match statistics.

Web Development Projects : *HTML, CSS, JavaScript*

- Created responsive portfolio and e-commerce webpages with auth system, payment gateway, API key integration.

ADDITIONAL INFORMATION

Certifications:- • Nvidia - Building LLM Applications With Prompt Engineering

• IIT Bombay EduPyramids - Python, HTML, C, JavaScript.

• AICTE (All India Council for Technical Education) - Idea Lab

Achievements:- Secured 1st Rank at TechSprint hackathon by GDG & Selected Finalist in SIH (2024,2025).

Activities:- • Vice Chair - ACM (Association for Computing Machinery) student chapter

- Technical and Design Team - Google Developer Group on campus
